

Chip PC Desktop Solutions Chosen by VMware for VMworld Labs: Where Reliability and Manageability are a Must!

VMworld 2009 Labs hosted nearly 500 Chip PC devices as the preferred desktop solution for VMware lab users: Xtreme PC NG6600 thin clients with multi-display support and powerful multimedia Plug PC thin clients

Chip PC advanced thin client technology was used at **VMworld San Francisco 2009** labs as it has been used by VMware over the past two years at all major VMware events, such as **Partner Exchange 2008, Partner Exchange 2009, and VMworld 2008.**

Chip PC was chosen as it enables VMware staff to:

- ❖ Quickly deploy and support VMware environment
- ❖ Effectively manage the devices with **Xcalibur Global** management software
- ❖ Flexibly and efficiently implement changes on any scale, from a single change on one device to global changes on multiple devices
- ❖ Completely rely on devices' strong performance and multimedia capabilities
