

# Chip PC is certified for watchboxx®

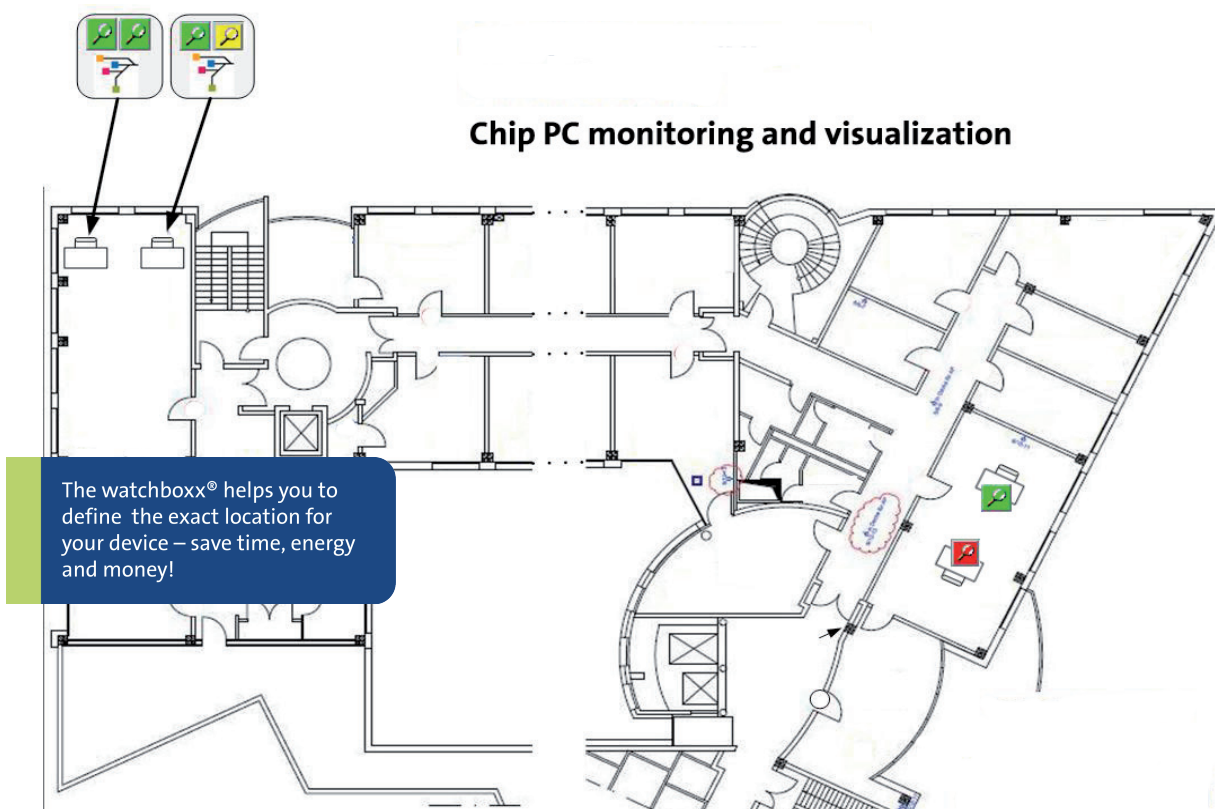

Chip PC Technologies is first to be certified as a Thin Client manufacturer for the watchboxx®. From now on all Chip PC Thin Clients can be monitored in the nagios®-based monitoring solution called watchboxx®.

## That's what you can do with a watchboxx®:

- you can monitor the elapse time for your Thin Client - Guarantee  
- in order to ensure full service!
- you can see at one glance whether your Thin Client is or is not connected to the server  
- you'll be up to date at every time!
- you can also monitor your entire IT with extensive interfaces with your hardware, software and facility  
- all in one dashboard!

The watchboxx® shows you the condition and the interaction of networks and its components, provides essential information on IT operations and displays relevant trends and tendencies.

watchboxx® - the proactive enterprise monitoring systems of Schindler Technik AG
